

# INSTALLING MAXLOAD PRO

**Please Note:** These instructions are for installing the software on a single PC, **for network versions please see the network install instructions**. It is recommended that a person in your Information Technology department install the TOPS software.

- ◆ Make sure you have administrative rights to the workstation you wish to install MaxLoad® Pro
- ◆ Close all applications on that workstation
- ◆ Start the installation process by inserting the TOPS CD in CD drive. If you have auto-play enabled the setup program will run automatically. Otherwise, go to Start | Run  
Type D:\SETUP and hit <enter> (where D is the CD ROM)
- ◆ A window will open for you to select the software you want to install. Select MaxLoad® Pro for 32-bit Windows
- ◆ Next window prompting for you to select sale or demo version of the software will open. If you have purchased the software then select Install Sale and insert the original MaxLoad® Pro floppy diskette in floppy drive. Otherwise select Install Demo
- ◆ Follow the prompts and complete the installation process
- ◆ Execute the MaxLoad® Pro by going to Start | Programs | Tops for Windows Apps | MaxLoad Pro (or MaxLoad Pro Demo)

**Note:** If during the installation an error message occurs, please make note of the error and continue with the installation until it is finished. Then, call TOPS Technical Support at 972.739.8677
