

Changing Logo in Reports within TOP Pro

The logo to be used in reports within TOPS Pro is defined in the “topspro.ini file”. To find out where the topspro.ini file resides, go to TOPS Help menu and look at the INI Path towards the bottom of the dialog box.

Using Windows Explorer, browse to the folder where topspro.ini resides and open the file using any editor. The sixth line down the [TOPSPRO] section is where the file to be used as logo will be specified.

```
[TOPSPRO]
DBPath=C:\TOPS560\TOPSPRO\DATA
AppPath=C:\TOPS560\TOPSPRO
LanguagePath=C:\TOPS560\TOPSPRO\Language
PictPath=C:\TOPS560\TOPSPRO\Pict
TroubleWizard=WRITE C:\TOPS560\TOPSPRO\PICT\TROUBLE.WRI
BMPPath=C:\TOPS560\TOPSPRO\BMP
```

```
LogoPath=C:\TOPS560\TOPSPRO\BMP\tops.BMP
```

```
CustomShapePath=C:\TOPS560\TOPSPRO\Style
PublishPath=C:\TOPS560\TOPSPRO\publish
WORDTEMPL=C:\TOPS560\TOPSPRO\MSWord
*UseRSCWGT=False
User=Package Design
```

To remove the TOPS logo from the reports, delete the file name (tops.bmp) from the line as shown here and make sure to save the topspro.ini file.

```
LogoPath=C:\TOPS560\TOPSPRO\BMP\
```

If you'd like to use another logo on the reports, refer the filename and the path of the new graphics in the Logopath line. For example, to replace the TOPS logo with “mylogo.bmp” stored in d:\mygraphics\logos\ folder, change the logopath line as illustrated below and save the topspro.ini file.

```
LogoPath=D:\mygraphics\logos\mylogo.bmp
```
