## **TOPS ENGINEERING AWARDED INBOUND LOGISTICS TOP 100 LOGISTICS IT COMPANY FOR 2014**

**RICHARSON**, Texas – May 5, 2014 - TOPS® Software Corporation, a leading provider of software for package design and distribution optimization announced today that it has once again been awarded the “Inbound Logistics Top 100 Logistics IT Provider”. This prestigious honor is awarded to the top providers of logistics solutions among over 300 candidates whose drive to provide solutions that create value for its customers.

According to Felecia Stratton, Editor, Inbound Logistics, the selection of the list has been tough. “When choosing the 2014 Top 100 Logistics IT Providers, Inbound Logistics editors looked at excellence in optimizing internal transport and logistics operations. At a higher, more strategic level, selections were based on how transformative solutions impact outward-facing business activities driving integration across internal, as well as external, business processes. TOPS Software was selected because its solutions solve specific logistics challenges and improve processes, and create a ripple effect of efficiencies across the entire value chain. Inbound Logistics is proud to honor TOPS Software for innovative solutions empowering logistics and supply chain excellence in 2014.”

“We are honored to be recognized to join this prestigious group of companies,” responded William J. Rehring, President and Director of Operations for TOPS Software. “TOPS’ mission has always been to provide timely and technological solutions to our customers. We listen and respond to their requirements and offer best-of-breed, all-encompassing solutions to ensure quick ROI and efficient implementation.”

The Top 100 list will appear in the April 2014 issue of Inbound Logistics as well as available online at [www.inboundlogistics.com](http://www.inboundlogistics.com).

**About TOPS®**

TOPS® Software Corporation, incorporated in 1990, is the world leader in the development of innovative software for the distribution and packaging professionals. Its flagship products, "TOPS®Pro" - Package Design and Palletization software and "MaxLoad®Pro" - Cargo Load Planning and Optimization software, has over 8000 installed base worldwide and serves big and small corporations across wide industries.

TOPS® also offers the first web-based package design software, TOPSePAC®, allowing package engineers to perform design and analysis anytime, anywhere, on any platform using any internet browser.

TOPS®, MaxLoad® and TOPSePAC® are registered trademarks of TOPS® Software Corporation.

**About Inbound Logistics**

Since its inception in 1981, Inbound Logistics' educational mission is to illustrate the benefits of demand-driven logistics practices, give companies the knowledge to help them match the inbound flow of materials to their demand, and align their business process to support that shift. Inbound Logistics offers real-world examples and decision support to guide businesses to efficiently manage logistics, reduce and speed inventory, and offset rising transport costs, supporting business scalability across their value chain. More information about demand-driven logistics practices is available at [www.inboundlogistics.com](http://www.inboundlogistics.com).
